

## RELEASE LINER

At BNT Sticky Solution, we specialize in producing high-performance release liners by combining advanced engineering, process precision, and premium certified raw materials.

Our production capabilities include both single-sided and double-sided silicone coatings, with a coating and printing width ranging from 1000 mm to 1700 mm. We also offer inline printing options, enabling custom branding or functional markings directly on the liner during production.

Designed for pressure-sensitive applications, our liners offer excellent stability, clean converting, and consistent release, meeting the critical demands of industries such as automotive, electronics, medical, and labeling.

	Range	Silicone Technology	Thermal Curing	Colours	Release Values FINAT-10
GLASSINE	55-120 gsm	Solvent-free/ Solvent based	✓	Yellow/White/Havana	Easy/Medium/Tight
CCK	55-140 gsm	Solvent-free/ Solvent based	✓	White	Easy/Medium/Tight
